Scheduled flights to/from China and access
to capacity of other carriers through interline
agreements

Charter flights upon request

Own fleet of unique freighters

Local offices in China for seamless
communications with importers

30+ years of experience – expertise, knowledge,
qualification

Volga-Dnepr is one of the major cargo carriers with expertise in integrated logistics services. Throughout 30 years the company has been delivering cargo worldwide, as well as providing services in insurance, MRO, trucking, and training areas.

Its vast scope of logistics services covers all stages of the transportation process – consulting, design & manufacture of special loading frames, packaging advice, **organization of multi-modal services, and first/last delivery.**

The company is constantly evolving its services to meet the growing demand for dedicated deliveries of healthcare, high-tech, aerospace, e-commerce, automotive, humanitarian, and other industries with a special focus on customized solutions.

VOLGA-DNEPR - our history

More than 30 years ago, Volga-Dnepr began its journey in the vast world of the aviation cargo industry, creating a unique market for the transportation of oversized and super-heavy cargo. Experienced specialists, a specialized fleet, competencies, and knowledge – all this enable us to carry out the most ambitious logistics projects.

▶ Volga-Dnepr Airlines was established in 1990 to pursue a unique goal – operate An-124 for commercial airfreight transportations of oversized and superheavy cargoes

1990

▶ Establishment of NIC Insurance Company, MRO base for An-124-100, Il-76, An-12 and An-32, the first Russian airline to gain customs carrier license

1995

▶ Launch of Volga-Trucks to provide door-to-door road feeder services

1997

▶ Volga-Dnepr initiated the Il-76 modernization, the engines and avionics were replaced and aircraft met all ICAO requirements.

2003

▶ Volga-Dnepr Airlines becomes an official IATA member

2004

▶ Volga-Dnepr Airlines signs a delivery agreement with the AviaStar SP aviation plant for five new AN-124-100M-150 freighter aircraft.

2005

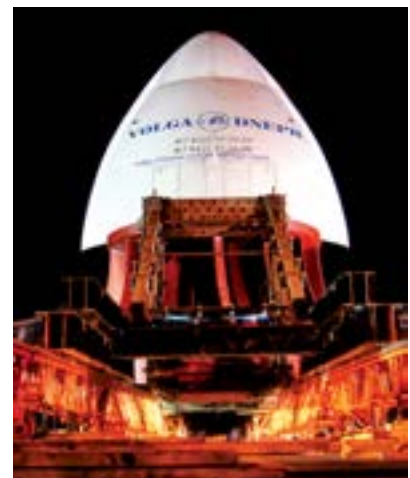

▶ Establishment of Volga-Dnepr Technics to centralize global MRO services

2008

▶ Volga-Dnepr Airlines adds a fifth new IL-76TD-90VD cargo aircraft to its fleet.

2012

VOLGA-DNEPR

our development, our success

Over the years, Volga-Dnepr has passed a bright and rapid path from a small group of enthusiasts from the Ulyanovsk aircraft plant to a recognized player in the global cargo transportation market.

▶ Volga-Dnepr Airlines – “Charter cargo carrier of the year”, Payload Asia Awards

2016 →

▶ Volga-Dnepr begins operating the upgraded An-124-100M-150 aircraft. The reinforced landing gears and cargo floor made it possible to increase the capacity of the existing Ruslans from 120 to 150 tons

2019 →

▶ Volga-Dnepr starts transporting medical goods: from masks and sanitizers up till ventilators and mobile hospitals as part of the battle against COVID-19.

2020 →

▶ In 2020-2021, Volga-Dnepr saved the lives of more than 500,000,000 people around the world by delivering more than 50,000 tons of covid cargo worldwide.

2020-2022 →

▶ Development of the full range of logistics services covering first and last miles, customs clearance, cargo insurance, consulting, and other aspects.

2023-2024 →

VOLGA-DNEPR our services

Volga-Dnepr offers complex logistics solutions, including through active cooperation with its partners.

Our advantages:

- ▶ Experience in the market of charter and scheduled cargo operations
- ▶ Own fleet of unique freighters and access to capacity of other carriers through interline agreements

VOLGA-DNEPR

our services

Volga-Dnepr unites professionals ready to offer individual logistics solutions for the customers.

LOGISTICS FROM ARCTIC TO ANTARCTIC – DELIVERY TO HARD-TO-REACH REGIONS

Volga-Dnepr Airlines provides unique services for cargo transportation to remote or hard-to-reach regions of the Arctic and Antarctic aboard IL-76TD-90VD.

Cargo delivery

The main advantage of the IL-76TD-90VD fleet in logistics to hard-to-reach regions of the Arctic and Antarctic is that it allows for safe and quick transportation of various types of cargo to prepared runways, as well as to snow and ice runways/sites. With a special permit, the Company can organize delivery to airports/sites with unsurfaced runways.

Cargo parachuting

Many years of experience in cargo airdropping, certified and qualified specialist powered by competences enable Volga-Dnepr to deliver cargo in sufficient volumes to the regions without airports and prepared runways. Cargo parachuting is a type of airdropping allowing for safe delivery of valuable cargo, food supplies in glass packaging, expensive equipment, heavy construction equipment, and drummed fuel.

Seamless and fast organization of long-haul and complex flights

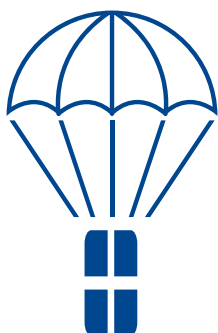

Qualified and certified specialists

Longstanding experience of working in remote regions

Own fleet of IL-76TD-90VD freighters certified for flight operations to remote regions

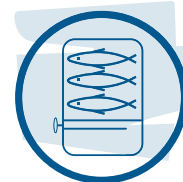

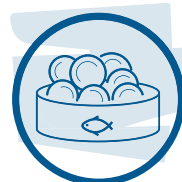

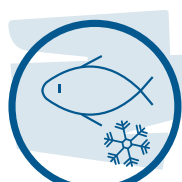

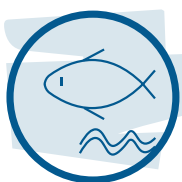

Seafood logistics

For more than 15 years, Volga-Dnepr has been delivering fish and seafood to various countries and regions in line with international standards, with special attention being paid to temperature control at each stage of transportation.

Volga-Dnepr is building a «fish bridge» in Russia, which will facilitate delivery of fresh fish and seafood from the fishing regions to Moscow, to the domestic market and increase export volumes to other countries.

- ▼ Full range of logistics services: first mile, packaging solutions, documentation, transportation, acceptance and last mile
- ▼ Flexible approach to services - from the range of services to a certain logistics leg
- ▼ Own fleet of freighters and access to the capacities of other carriers
- ▼ Scheduled flights to/from China and charter flights on request, incl. from the Far East to Moscow
- ▼ Own fleet of refrigerated semi-trailers
- ▼ Availability of special equipment – thermal boxes, passive packaging, dry ice, warehousing
- ▼ Temperature control and strict timeframes for delivery of special cargo
- ▼ Control at each stage of transportation
- ▼ Aligned system of stakeholders in accordance with the internal risk assessment system for suppliers
- ▼ Consulting services and customized solutions, compliance with international standards IATA PCR and IATA LAR

VOLGA-DNEPR Fleet

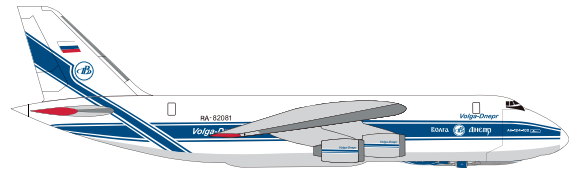

9_x An-124-100

2_x An-124-150

5_x IL-76TD-90VD

An-124-100/150

PAYLOAD – 120, 000/150, 000 kg

An-124-100 is the world's largest, mass produced, civil cargo aircraft and is a recognized leader of the air cargo industry for its ability to transport oversized and super-heavy shipments.

The combination of exceptional characteristics such as its cargo compartment size, flight range and uplift capability (without the need for special loading equipment) allows the An-124 to carry super-heavy and oversized cargoes including equipment up to **120 tonnes (An-124-100)** and up to **150 tonnes (An-124-150)**.

IL-76TD-90VD

PAYLOAD – 50, 000 kg

Volga-Dnepr participated in the cross-section modernization of the **IL-76TD**, one of Volga-Dnepr's most successful cargo aircraft thanks to its cabin size, carrying capacity and autonomous loading capabilities.

The resulting product is the **IL-76TD-90VD**, equipped with new **PC-90A-76** engines and modern avionics, approved for worldwide operations.
