# Volga-Dnepr's fleet

## An-124-100/150

Payload – 120, 000/150, 000 kg

Volga  Dnepr

9x An-124-100  
2x An-124-150  
5x IL-76TD-90VD

## IL-76TD-90VD

Payload – 50, 000 kg

**An-124-100** is the world's largest, mass produced, civil cargo aircraft and is a recognized leader of the air cargo industry for its ability to transport oversized and super-heavy shipments.

The combination of exceptional characteristics such as its cargo compartment size, flight range and uplift capability (without the need for special loading equipment) allows the An-124 to carry super-heavy and oversized cargoes including equipment **up to 120 tonnes** (An-124-100) and **up to 150 tonnes** (An-124-150).

Volga-Dnepr participated in the cross-section **modernization of the IL-76TD**, one of Volga-Dnepr's most successful cargo aircraft thanks to its cabin size, carrying capacity and autonomous loading capabilities.

The resulting product is the IL-76TD-90VD, **equipped with new PC-90A-76 engines** and modern avionics, approved for worldwide operations.

In 2022, Volga-Dnepr launched new services for express-delivery of cargo following the market sentiment and customers' demand.

## International express delivery

### International express delivery of your cargo

- 'Door-to-door' delivery of B2B shipments
- Shipment weight — up to 300 kg
- The rate covers 'door-to-door' delivery
- Standard customs clearance и express customs clearance

### Our advantages:

- 30+ years of experience in international logistics
- In-house fleet of freighters
- Customs clearance competence — Volga-Dnepr Express is a licensed customs agent
- International team — offices in China

VD Express today is the team of logistics practitioners who are powered by in-house fleet of freighters, trucks, customs agent, and insurance company.

**Volga-Dnepr Group follows a peace-keeping concept and does not accept military goods for export, transit and import.**

Goods excluded from transport are goods specially designed or modified for military use, including arms, ammunitions, bombs, tanks, imaging devices, military aircraft, warships and chemicals (the list of such items can be varied depend on the country legislation), as well as goods from/to shippers and consignees, which are related to military organizations (such as Ministry of Defense, Air Forces, Navy etc.).

To mitigate any possible risk at all stages of transportation, customers are required to provide the exact details of the following information at the time of booking, in particular for any possible dual use and/or military related goods:

A specified description of goods is required. General terms are not sufficient, i.e. the term “spare parts” is not acceptable as a description. Customers should use “Guidelines on acceptable and unacceptable terms for the description of goods for exit and entry summary declarations”, the EUROPEAN COMMISSION, Brussels, 21.09.2007, TAXUD/1402/2007 as a reference.
